

JD: Senior Backend Engineer

We are hiring a **Senior Backend Engineer** with strong problem-solving and data structures expertise.

Interview Format

Duration: **90 minutes**

Focus: **Medium and Hard level DSA problems**

Candidates are expected to write clean, optimized, and production-quality code

Emphasis on approach explanation, edge cases, and time-space complexity analysis

Role Expectations

Strong foundations in Data Structures & Algorithms

Ability to design efficient solutions under constraints

Clear communication of thought process and trade-offs

Writing scalable and maintainable backend-oriented logic

Candidates should demonstrate senior-level reasoning, not just correct answers.
